

Record tag applications and births

You can record when tags are applied to animals or animals are born. This is used to begin the tracing of an animal and to maintain the online holding register.

- On the top navigation bar click on **Farm Records**. Move your mouse over **Manage Animals** on the tool bar. From the drop-down list of options select **Apply Tags / Record Births**.

ANIMALS WITH MANAGEMENT INFORMATION

- Enter the details of the tag application CPH, Species and date.
- If the animals are individually identified and you want to record management information for each animal such as a gender, breed, dam and sire, tick **Record management info for each animal**. Mandatory fields vary depending on the species and are highlighted by a red star (*)

Pedigree Details ?

Birth Dam

Animal born following embryo transfer

Sire

- If the animal was born following embryo transfer specify the recipient as the birth dam and enter the genetic dam.
- Click **Add Another Animal** to enter another animal that has the same application date or the same holding.

ANIMALS WITHOUT MANAGEMENT INFORMATION

- If you did not tick **Record management info for each animal** you can next optionally enter the date of birth and breed.
- Enter the identifiers of the tags applied. If the tags individually identify the animals, enter a list of tag numbers in the box, one per line. If the tag numbers are in a sequential range, click the **Add Identifier Range** button and enter a start tag number and animal total, then click **Add**.
